

Flink Learning

Gómez & Gómez Interactive

Gómez & Gómez Interactive is a comprehensive vocabulary development program for Gómez & Gómez schools. There is a stronger connection between vocabulary and scores on multiple-choice exams than there is between either pre-course knowledge or critical thinking skills and exam scores.

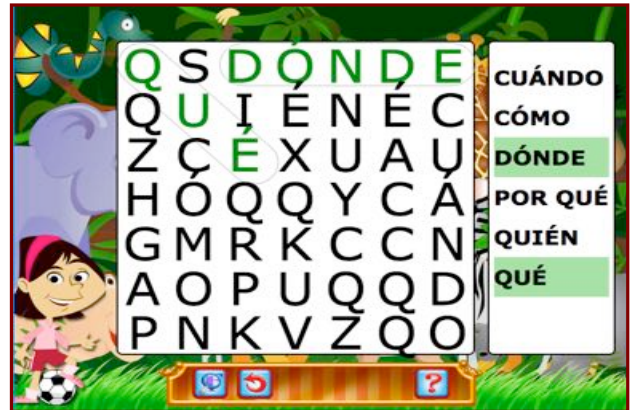

Integration with Gómez Methodology

Software can be used to support both instruction and practice:

1. Extra vocabulary lessons in the LOI
2. Supports Specialized Vocabulary Enrichment in both Spanish and English
3. Conceptual Refinements can be accomplished online with less teacher involvement
4. Always available in Bilingual Learning Centers & Bilingual Research Centers
5. Online supplement for word walls & word boards
6. Computer-based journal writing builds keyboard skills
7. Students can independently brush up on LOD vocabulary

Benefits of Gómez & Gómez Interactive

- *Gómez & Gómez Interactive* is student-centered, empowering students to choose learning activities at any level is comfortable.
- Learners monitor their progress with graphical reports for the skills and words they master.
- *Flink Bilingual Literacy* has been designed for use by teams to motivate learners.
- Building Activities for each other accelerates learning. *Gómez & Gómez Interactive* helps students learn by creating software games for their learning partners, engaging students in higher order thinking skills and self-directed learning aligned with the Gómez & Gómez DLE Lesson Cycle. Ideal in BLCs and BRCs!
